

Kask Superplasma PL

Reference#

VENTILATION

Maximum ventilation thanks to the ten air intakes. The air intakes and the internal outflow channels guarantee effective breathability.

LUMINESCENT CLIPS

Helmet equipped with strong nylon external luminescent lamp carrying clips, compatible with all headlamps with elastic bands on the market.

REFLECTING STICKERS

Adhesive reflecting stickers for high visibility.

AIR GRID

The air intakes are equipped with an anti-intrusion grille, that prevents entry of debris whilst maintaining breathability.

CHINSTRAP EN 12492

Four point chinstrap with which is crossed at the back to secure the helmet to the head better. The safety release system allows quick fastening and opening of the locking mechanism in conformity with EN 12492. Provided with lateral divider for adjusting the length of the straps.

RING TO HOOK Fitted with a special loop on the chin strap which allows the helmet to be connected to the harness.

SANITIZED®

The Sanitized® treatment is an antibacterial treatment that acts as an internal deodorant counteracting the development of unpleasant odors. Thanks to its hygienic function it effectively prevents bacterial proliferation by increasing freshness and comfort of the fabric in contact with skin.

2DRY

This high-tech and maximum comfort fabric dries very quickly, encouraging the expansion and dispersion of moisture to the outside and leaving a pleasant feeling of freshness.

Adjustable from 51cm to 63cm
