

SeaRescue II

Reference# 85508-10350L

SeaRescue II

SeaRescue II was designed for rescue personnel by rescue personnel. The suit is used by rescue services all over the Norway, including, at the last count, 177 fire brigades. It is a suit that is ideal for rescue operations on rivers, on ice for and for surface swimmers. The suit is reinforced in exposed places like the knees, seat and elbows. Its unique construction gives the user full freedom of movement. The suit is fitted with a protected latex neck and cuffs. The special construction and choice of materials make it the market's lightest and most comfortable rescue suit. SeaRescue II is also available with a specially designed, optional, adjustable neck closure in neoprene that makes it even easier to don and even more comfortable to use.

Facts

- Main fabric in soft, durable and breathable HP Superlight 3L
- Yellow colour and SOLAS approved reflective patches for good visibility
- Robust waterproof diagonal seal in PU that works smoothly (TiZip Masterseal)
- Detachable elastic braces for individual adjustment
- Reinforced seat, elbows and knees for maximum durability
- Spacious thigh pocket as well as pockets on the sleeves
- Neck and sleeve seals in latex for maximum water tightness, and with protective cuffs
- Option for choice of adjustable neck seal in neoprene - perfect for ventilation of excess heat in non-exposed situations
- Unique construction provides good fit and maximum freedom of movement
- Integral rubber and neoprene boots with soft sole for good mobility and protection
- Suitable for use with flippers
- Strong loop inside for easy storage when not in use
- Automatic valve on sleeve / shoulder ensures maximum evacuation of air from the suit
