

Washable, reusable coat for hospital use

Reference# 36876-99900L

Liquid resistant coat in waterproof coated polyester fabric. Can be washed, disinfected and reused. Recyclable materials are sustainable and environmentally friendly.

For flexibility, the jacket is equipped with both a drawstring waist and buttons at the back. The infection protection coat meets the requirements for washing at 85 degrees Celsius and full drying at high temperature. Alternatively, it can be disinfected with LifeClean liquid disinfectant (Spray on - leave for 2 minutes - rinse off).

The coat meets the central requirements *EN 14126:2003 Protective clothing - Performance requirements and testing methods for protective clothing against infective agents*.

Manufactured in two sizes, Large (standard) and Medium.
