

Bio Wrist Seal

Reference# 13760

The Bio Wrist Seals are a revolutionary new concept in assisting a drysuit user or diver to achieve comfortable and continual leak free wrist seals, both underwater or if used repeatedly in and out of water.

Standard Neoprene or Latex drysuit wrist seals can develop problems with minor leaks, due to imperfections, around the areas where the users wrists meet the drysuit wrist seals. This can become uncomfortable, especially after extended periods in and out of or under water, both during the dive and on the surface, between additional repeat dives.

Worn under your standard drysuit wrist seals, these unique Apollo Bio-Seal wrist seals vastly reduce leakage problems, by providing a comfortable and perfectly smooth seal between the users wrists and the fitted drysuit wrist seals.

The Bio Wrist Seals are made from a unique Cosmogel compound gel, which has a super high and very extensive stretch rate (1300%-1500%), far superior to standard Neoprene or Latex wrist seal materials, improving their water sealing ability and increasing comfort and are supplied complete, in a bespoke dry storage container.

Apollo's patented Bio-Seal is the ultimate in flexibility, moulds perfectly to a divers wrist and equally to the drysuit wrist seals, increasing diving comfort, decreasing and in most cases completely eliminating water leakage around the wrist areas.

This unique seal material does not contain latex, assisting any users susceptible to skin rash around the wrist areas and equally, any diver with an allergy to Latex.

Although very useful for surfers and divers, many other water sports participants will also find the Apollo Bio-Seal wrist seals an equally useful addition to their water sports equipment.

Please Note - This product contains certain oils, which can sometimes cause early wear in latex type drysuit wrist seals. Therefore, cleaning thoroughly the Latex wrist seals of your dry suit, after use, will help extend the life of your drysuits seals.

Supplied 'One Size' but flexible enough to suit most wrist sizes. SOLD AS PAIR
