

ND Metalux Arctic Undersuit

Reference# 100841-L

Metalux is an effective, lightweight and high-performance insulation material that reduce airflow and reflects heat radiation. Metalux retains its impressive insulating property even when wet or compressed, and throughout the life of the garment.

Metalux is durable, has a long service life and can be machine washed. Suitable for use with all our neoprene and dry suits. This model is suitable for extreme diving conditions and / or for under dry suits without thermal properties.

Flexible panels in the lower back, shoulders and feet provide exceptional freedom of movement.

- Lightweight and durable
- Fleece lining
- Quick-drying
- Bacteria and fungus resistant
- Chest pocket with zipper
- Pockets on the hips
- Two-way YKK zipper
- Mesh bag with drawstring included
