

1000S Front Aircrew J-Don Immersion Suit

Reference# 83308-12250SR

1000S Front Aircrew J-Zip Immersion Suit

The suit is equipped with a J-shaped main zip (around the neck) and a separate neoprene neck seal. Internal braces and internal lining with Velcro fastening. The suit has a removable map pocket. The outer shell of the suit is waterproof, breathable and flame retardant. Anti-microbial lining with temperature regulating phase change material, originally developed for spacesuits by NASA. The material emits stored heat in cool environments and emits cooling in warm environments. The suit is EASA ETSO 2C503 approved as a crew suit with lining providing a minimum of 4 hours of thermal insulation in cold water.

Compatible with Halo Aircrew Lifejacket

Facts

- J-lock w/separate neck seal
- Anti-microbial lining that integrates NASA-developed technology to facilitate thermal regulation - providing increased comfort and survivability in water
- Produced in GoreTex Nomex III - best flame retardancy combined with durability and breathability
- Ergonomic design that has been tested on all major aircraft types
- Pockets can be adjusted to suit aircraft, mission or pilot
- Elastic and comfortable glide skin neoprene seals
- Valve on the sleeve/shoulder which ensures that the suit is ventilated to the maximum extent

Product Detail

Area of application

Helicopter Crew
Offshore Oil & Gas
Offshore Wind Energy

Type of suit

Pilot/Crew suit

Material

GoreTex Nomex III 3L

Lining

Velcro attached lightweight thermal liner

Adjustments

Waist adjustment

Main zipper type

PU/Plastic, closed

Neck seal

Neoprene glide skin

Wrist seals

Neoprene
