

Yak Throw Bag with Line

Reference# 83215-15m

For use in rescue situations, this throw bag has a 'bullet bag' design to ensure a long and accurate throw. The removable waist belt allows for the throw bag to be carried with ease and intuitively accessed when needed. Available in 15 m, 20 m and 25 m, each line is constructed from a continuous length of 8 mm thick floating line - with a maximum load of 300 kg. The bag is constructed from 600 D quick dry Polyester and includes a reflective strip to aid visibility.

Yak Throw bag is used by RNLI and is standard equipment onboard all vessels in the Norwegian Society for Sea Rescue (NSSR/Redningselskapet) and used in their courses and training programs for rescue personnel.
