

Ice Spikes

Reference# 100837

Smooth and easy-to-use, high-quality ice spikes. The spikes have a well-developed ergonomic handle that provides a natural and secure grip on the spikes. The handles are given a red color to give high visibility in situations with low light, fog, haze, snow, etc. The spikes are delivered with a convenient holder that protects the spikes and allows you to attach the spikes to the chest for easy and quick access, possibly in the pocket without risking damage to textiles and other equipment. The spikes are made of steel and have a length of about 30mm and provide an extremely good grip in the ice. This model has been given the highest score for both the comfort and function of the Finnish Institute of Occupational Health (FIOH). It also comes with a red safety whistle attached to the holder. Complete ice spikes (pairs) with protective covers for the spikes.
